

Transport Design Guide

Transport facilities play an important part in achieving the desired urban quality living. The Transport Design Guide (TDG) is prepared to support the achievement of this objective particularly from the transportation point of view. In particular, it intends to create an efficient intra-city and inter-city transportation system and network.

The TDG will assist those involved in the transport planning and design of transport facilities in Putrajaya as follows:

- It defines the transport policies adopted for Putrajaya
- It provides developers with specific guidelines and standards
- It illustrates what Perbadanan Putrajaya expects to see in terms of good design, following the best practices
- It highlights the need for comprehensiveness and the integration of travel by all modes
- It explains what is required of developers in making their submissions to Perbadanan Putrajaya.

Briefly, the TDG covers the following matters:

- Transport Goals and Objectives
 - Highway Strategy
 - Public Transport Strategy
-
- Design Guidelines and Standards
 - Design of Roads
 - Design of Public Transport Facilities
 - Car Parking
 - Pedestrian and Cycle Facilities
